

Call for Experienced Content Editors in the field of Injuries to join Cochrane Editorial Board

Cochrane Emergency and Critical Care and Cochrane Anesthesia is currently seeking knowledgeable individuals to join the Editorial Board and contribute to the advancement of the field of injuries. As an expert in this domain, your unique insights and expertise can play a pivotal role in shaping the direction of Cochrane publications in this field and foster a community of professionals dedicated to injury prevention, management, and rehabilitation.

Why Join Our Editorial Board?

By becoming a part of our Editorial Board, you will have the opportunity to:

- A. **Influence Scholarly Discourse:** Shape the landscape of injuries research by actively participating in the review and selection of high-quality manuscripts.
- B. **Contribute to Knowledge Dissemination:** Help disseminate cutting-edge research and best practices to a global audience, fostering the exchange of ideas and promoting advancements in the field.
- C. **Network with Peers:** Collaborate with fellow experts, researchers, and professionals in the emergency care and injuries domain, building valuable connections within the academic and industry communities.

Who Are We Looking for?

We are seeking knowledgeable people of The Cochrane Collaboration and Cochrane Reviews. Experts with strong interest in the reviews covered by Cochrane Emergency and Critical Care, Cochrane Anaesthesia and Cochrane Injuries in particular.

We expect that you have:

- Peer review experience of Cochrane reviews
- Institution and/or personal commitment to enable time to join Editorial meetings.
- Some experience in conducting a Cochrane Review.
- Knowledge of clinical trial design and epidemiological methods.
- Familiarity with a broader range of research methods.

We are seeking experts with a background in one or more of the below categories:

A. General topics related to trauma and injuries, e.g.:

Pre-hospital care of trauma
Burns
Envenomation
Poisoning
Frostbite
Minimising blood transfusion and blood loss

B. Topics related to parts of the body, e.g.:

Orthopaedic trauma
Abdominal trauma

Chest trauma
Head injury
Spinal cord injury

C. Prevention, e.g.:

Prevention of road traffic injuries
Injury prevention

D. Disaster and Preparedness

How to apply?

If you are enthusiastic about making a significant impact in the field of injuries and possess the necessary expertise, we invite you to submit your application by sending your resume, a brief cover letter outlining your relevant experience, and a list of your recent publications to naomi.dayan@regionh.dk.

Application Deadline: March 1, 2024, 16:00CET

About The Review Groups (CRGs) Editorial Board (EB)

The impact and role of our Editorial Board (EB) is significant and multifaceted. The board is instrumental in ensuring the quality, integrity, and relevance of our published reviews. The roles encompass several critical functions that contribute to the advancement of knowledge and expertise. The EB consists of medical doctors, statisticians and methodologists, an Information Specialist, a Consumer Expert and a Managing Editor.

The Editorial Board meets once a month to identify topics and articles that are relevant, timely, and of interest to the healthcare community. This role helps disseminate valuable research and clinical information to healthcare professionals, researchers, policymakers, and the public.

In addition, the EB fosters collaborations and networking among experts and researchers in our fields. They bring together professionals from various disciplines e.g. physicians, and other health care professionals as well as statisticians and other research methodologists to exchange ideas, share knowledge, and address possible challenges.
